

# Data & AI Program Leadership

*"Will our Data & AI initiatives be delivered as intended?"*

# Data & AI Program Leadership

Executive Question: "Will this initiative be delivered as intended?"

## The Challenge

Large data and digital transformation programs involve multiple stakeholders, vendors, and technical workstreams. Without strong leadership and governance, these initiatives often struggle with coordination, unclear priorities, and delivery risks.

## What We Do

Data Roadmaps (DR) provides experienced program leadership to guide complex data and AI initiatives from strategy through execution. Our focus is to ensure alignment across stakeholders, maintain delivery momentum, and keep initiatives focused on measurable outcomes.

## Engagement Approach

01

**Establish program governance structure**

02

**Align stakeholders on priorities and milestones**

03

**Coordinate cross-functional delivery teams**

04

**Track program progress and risks**

05

**Facilitate executive reporting and decision support**

## Tangible Outcomes

**Strong program governance and coordination**

**Improved visibility into delivery progress**

**Early identification and mitigation of program risks**

**Clear alignment between strategy and execution**

**Consistent executive reporting and communication**

## Engagement Duration

Multi-phase engagement providing program leadership throughout the lifecycle of data and AI initiatives.
