

Data & AI Readiness Assessment

*"Are we ready to invest in the
right Data & AI initiatives?"*

Data & AI Readiness Assessment

Executive Question: Are we ready to invest in the right data & AI initiatives?

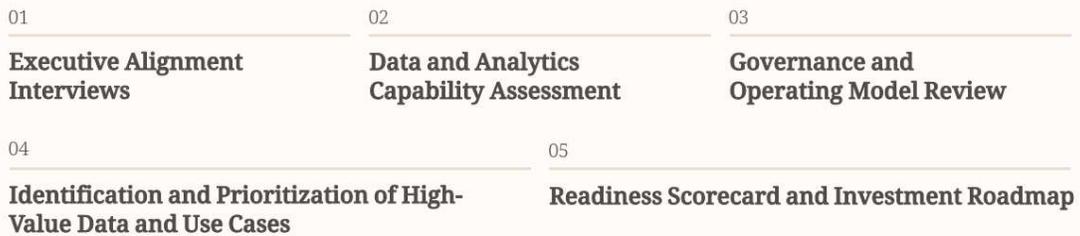

The Challenge

Many organizations begin data and AI initiatives before establishing the necessary foundations across business alignment, governance, data architecture, and delivery capability. This often leads to stalled initiatives, unclear priorities, and fragmented investments.

What We Do

Data Roadmaps (DR) conducts a structured assessment to evaluate an organization's readiness to launch or scale data and AI initiatives. The assessment brings together stakeholders across business, technology, and operations to identify strengths, gaps, and opportunities.

Engagement Approach

Tangible Outcomes

Estimated Duration
4-6 weeks, depending on the organization's readiness and availability of key stakeholders.
